Special Communication to Families

Dear Family Members, Guardians and Friends of Spectrum for Living,

I hope that each and every one of you and your families are well. Following new guidelines issued by the New Jersey Department of Human Services Division of Developmental Disabilities ([DDD - See Attached](#)), *effective this Sunday, July 26th, we will begin allowing scheduled visits by families and friends of our residents inside of our apartments and group homes under certain conditions.* Please note that visitation will require guardian consent as well as a signed visitor agreement in advance of any visit. Per DDD guidance, we will continue to permit outdoor visits as well.

We appreciate your continued understanding and cooperation with the restrictions on in-person visits we have had to implement in response to the pandemic. Please contact program management at your loved one's residential apartment or group home to arrange for a visit.

We wish you and your family members continued good health. Be well.

Regards,

Christopher Perry
President & CEO
